

MUHAMMAD SULTON TAUHID

SOFTWARE ENGINEER | FULL-STACK WEB DEVELOPER | NEXT.JS / MODERN WEB

Jakarta, Indonesia | msulton55@gmail.com | +62 822-9902-4212 | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Software Engineer / Full-Stack Web Developer with approximately 3 years of professional software development experience across web applications, dashboards, GIS platforms, and data-driven systems. Hands-on experience with React, Django, PostgreSQL, WebGIS, API/service integration, Agile delivery, technical documentation, and UI/UX flows. Combines software development with business and data-process experience to translate operational needs into practical software solutions.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, SQL

Frontend: React, Vue.js, Ant Design, Responsive UI

Backend: Django, Python, REST/API Integration

Database: PostgreSQL

Engineering: Git, Jira, Agile, SRS, SDD, ERD, UI/UX Flows

GIS & Data: ArcGIS, QGIS, WebGIS, Excel, Google Sheets, Data Reporting

Additional: Electron, Machine Learning, Google Vision API

PROFESSIONAL EXPERIENCE

Field Operations & Data Analyst | PT Bandar Pelumas Sejahtera Abadi • Jan 2023 – Present

- Automated warehouse data-entry workflows, reducing manual errors by 30%.
- Analyzed 2023–2024 revenue reports and identified cost-saving opportunities worth \$307,600.
- Developed 5+ workshop service packages, contributing to a 15% increase in customer retention.
- Improved operational workflows through structured data handling, reporting, and process optimization.

Software Engineer | BAPPENAS RI • Feb 2021 – Dec 2022

- Built a regional WebGIS platform using Django and ArcGIS, improving workflow efficiency by 20%.
- Led Agile sprints using Jira and delivered 4 MVPs ahead of schedule.
- Created ERDs, UI/UX flows, SRS, and SDD documentation to support software development and delivery.
- Collaborated with planning teams across 3 regions and delivered weekly data insights through dashboard/WebGIS integration.

Frontend Developer Intern | TitipPaket • Oct 2020 – Jan 2021

- Developed a React + Ant Design dashboard with data tables, filtering, and administrative workflows.

Full-Stack Developer | Joomva • 2020

- Contributed to an e-learning management system supporting school management and video-conferencing workflows.

Java Freelance Developer | Freelance • 2020

- Developed a sea-route calculator using Dijkstra's algorithm with mapping functionality.

SELECTED PROJECTS

AJB Document Entity Recognition — *React, Python, Machine Learning, Google Vision API*

Automated document parsing and entity-recognition workflow for land-deed documents.

WebGIS Regional Planning Platform — *Django, ArcGIS, WebGIS*

Regional planning platform integrating geographic data, dashboards, and planning workflows.

Seighneur Application — *Electron, React*

Desktop inventory system for land-asset management.

TitipPaket Admin Dashboard — *React, Ant Design*

Administrative dashboard for structured data management and filtering workflows.

EDUCATION

Bachelor of Engineering, Computer Engineering | University of Indonesia • GPA 3.31

- Thesis: Machine learning-based land deed recognition system using React and Python.

CERTIFICATIONS & HIGHLIGHTS

- EF SET English Certificate — 70/100, C1 Advanced (2025).
- Global Goals Ambassador (2019).
- 3rd Winner — Entrepreneur Challenge, UNJ.
- 3rd Best Participant — Startup Academy, Compfest X.

TARGET ROLE

Software Engineer / Full-Stack Engineer / Frontend Engineer / Next.js Developer / React Developer
